

## Technical Outlook: Nifty

Nifty started the day with a marginal gain and traded in negative for the day. Nifty witnessed buying in final hour of trading session and closed flat for the day. Overall it was volatile day for nifty bank also which traded in a 300 points range and register all time high. Nifty continue to close higher after election results are out. On weekly chart Nifty has given breakout of horizontal trendline which is supported by the runaway gap. Bank nifty on the other hand is trading near its all time high levels supported with the broadening pattern breakout. The momentum indicator RSI (14) on 60 mins chart is near its overbought zone. Profit booking from current level cannot be ruled out. However RSI (14) on daily chart is reading above 60 with upward trend.

Every dip in nifty should be considered for buying. So the overall bias is said to be positive. As we are trading in uncharted territory some knee jerk movements cannot be ruled out. Index hold a strong support at 11600/11700 level Drift below 11600 may seen further correction till 11400 in coming trading session. Going forward, resistance is pegged at 12000/12050 levels for coming weeks which will be a new high for a nifty.
