

Daily Technical Outlook: Metals and Energy Feb 22th, 2022

Bullion Index

The Benchmark index saw a flat opening on 21/02/22 & following a sideways to bearish momentum in morning session but it had witnessed a small recovery in evening session, closing was negative around 0.20% at 14610.

After a flat opening index had witnessed a bearish momentum in morning session but it had seen a bit of recovery in evening session. Index from last 2 days trying to break its falling trend line resistance of 14750. If index sustained above its resistance level then there will be continuation upside & 14950 will be next level to watch for index.

Price is trading above 20 & 50 Daily EMA, which is a positive for the index. Now 14400-14350 will be acting as a strong support zone for the index as there is 200 Daily Ema is placed & we should consider this as a buy on dips counter till the time it is holding support levels.

On daily chart momentum oscillator RSI & EMA 20 showing a positive momentum as it had sustained above 60(reading at 62) which shows index is currently in a bullish territory & there is further room in upside still left.

So, Bullion Index had given a closing near its resistance of 14700-14750 level & till the time it is Sustaining above 14350 there will be a continuation in upside possible & breaking of 14750 will be consider as a falling trend line breakout & from there fresh buying can be seen in index & 14950-15120 will be next level on upside can be seen.

Metals Index

The Benchmark index saw a flat opening on 21/02/22, following a sideways to volatile momentum throughout the day, closing was negative around 0.15% at 18710.

After flat opening index was trading sideways in morning session as well as in evening session, index from past 2 weeks trying to sustain above its immediate support or retest level of 18500-18600 & it's been in a range of 18850-18600. Till the time index is holding its retest levels we should consider this as a buy on dips counter.

Price is trading above its 20 & 50 Daily EMA which is a positive for the index & on lower time frame 50 EMA is placed at 18650 which is acting as a support for the index. 18600-18500 which is previous break out zone will be now acting as immediate support for the index & we should look at buy at retest levels & index is been in a tight range from last 2 weeks, now there is a most probability it will give a strong move on either side.

On the daily chart, momentum oscillator RSI (14) & EMA 20 showing a positive momentum as it is continuously sustaining above 60 (reading at 61) & it indicates that index has still strength to continue its trend and also ADX shows reading at 36

So Base Metal trying to sustain above its immediate support level from last 2 weeks, if index sustained this levels then there will be perfect retest & then 19100 will next level to watch in coming trading days. 18850 will be acting as a immediate resistance.
