

KEY HEADLINES:

- The dollar was little changed against a basket of major currencies on Monday as traders awaited a much-anticipated U.S. Federal Reserve meeting later this week that might signal a change in the outlook for U.S. monetary policy.
- Currency markets settled in tight ranges with implied volatility plumbing to multi-year lows after last week's strong inflation readings and a dovish European Central Bank meeting failed to dislodge currencies from recent trading levels.
- The dollar index , which measures the greenback against a basket of six currencies, was about flat on the day at 90.512. Last week the index rose 0.4%, its largest weekly change in five weeks.
- The Fed begins a scheduled two-day policy meeting on Tuesday. Nearly 60% of economists in a Reuters poll said a much-anticipated taper announcement will come in the next quarter, despite a patchy recovery in the job market.
- In cryptocurrencies, bitcoin traded above \$40,000 for the first time in more than two weeks, before pairing gains to trade at \$39,649.03.
- .

Economic Indicators to be released.
