

KEY HEADLINES:

The Indian rupee end little change on Wednesday after recorded its steepest drop in about 2-months on previous day, as price swing between ups and down during budget session but ended flat in absence of any major announcement in budget and flat dollar index ahead of FED rate statement later on day.

The rupee at NSE Future gain marginally to end at 81.99 against previous close of 82.01 and after make low of 81.77 and high of 82.14 during the day.

In its budget, India announced one of its biggest ever increases in capital spending for the next fiscal year to create jobs but targeted a narrower fiscal deficit in its last full budget ahead of a parliamentary election due in 2024. India's federal government will target a budget deficit of 5.9% of GDP for 2023/24, Finance Minister Nirmala Sitharaman said in her budget speech on Wednesday, while pegging gross market borrowing at an estimated 15.43 trillion rupees.

The Federal Reserve raised its target interest rate by a quarter of a percentage point on Wednesday, yet continued to promise "ongoing increases" in borrowing costs as part of its still unresolved battle against inflation. "Inflation has eased somewhat but remains elevated," the U.S. central bank said in a statement that marked an explicit acknowledgement of the progress made in lowering the pace of price increases from the 40-year highs hit last year. Still, the Fed said the U.S. economy was enjoying "modest growth" and "robust" job gains, with policymakers still "highly attentive to inflation risks."

The dollar pared losses on Wednesday after the Federal Reserve hiked rates by 25 basis points, as was widely expected, and promised "ongoing increases" in borrowing costs as part of its still unresolved battle against inflation. The dollar was last down 0.17% on the day against a basket of currencies at 101.90, after earlier falling to 101.64. The euro was last at \$1.09090 against the greenback, up 0.45% on the day, and the dollar was down 0.38% on the day against the Japanese yen at 129.63.

The key for the rupee and other emerging market currencies this year will be contingent on how the U.S. inflation and growth data shape up and how they affect the U.S. Federal Reserve rate expectations.
