

KEY HEADLINES:

The **rupee** fell 2 paise against the US dollar on Thursday, after the Reserve Bank kept the key interest rate unchanged amid a negative trend in domestic equities.

The rupee at NSE Future 30 June ended weak by 2 paise at 82.59 against previous close of 82.57 and after make low of 82.58 and high of 82.65.

The Reserve Bank of India on Thursday opted for a pause second time in a row, maintaining key benchmark policy rate at 6.5 per cent citing moderate inflation. The central bank kept its GDP growth projections for the current fiscal (April 2023 to March 2024) unchanged at 6.5 per cent while marginally lowering the retail inflation expectation to 5.1 per cent from the previous 5.2 per cent. On rupee, RBI Governor Shaktikanta Das said the domestic unit has remained stable since January this year.

Monsoon rain reached the coast of India's southernmost Kerala state on Thursday, offering relief to farmers after a delay of more than a week, marking its latest arrival in four years.

Fed officials are in a blackout period ahead of the U.S. central bank's June 13-14 meeting and the next major economic release will be the consumer price report for May on June 13. The European Central Bank is expected to raise rates by 25 basis points (bps) when it meets next Thursday, to be followed by another 25-bps increase in July, taking rates to 3.75%.

The dollar fell on Thursday after data showed that U.S. jobless claims rose more than expected in the latest week, though the market was generally viewed as consolidating ahead of key inflation data and the Federal Reserve's interest rate decision next week. The greenback has been bolstered by expectations that the Fed will hike rates in July, though it is widely expected to pause hikes at the conclusion of its June 13-14 meeting. The dollar index, which measures the currency against six major peers, was down 0.67% to 103.33 and got as low as 103.29, the lowest since May 23.

The key for the rupee and other emerging market currencies this year will be contingent on how the U.S. inflation and growth data shape up and how they affect the U.S. Federal Reserve rate expectations.
